

The Network Services Department of Information Technology and Telecommunications (ITT) strives to provide the Dillard University community with high quality technological services. We provide campus-wide support and services to the faculty, staff, and students. We are also responsible for Internet/network connectivity both internal and external to the campus.

Our services are:

Systems Configuration Procurement
Server and Network Resource Management
System Setup and Deployment

Our department has many resources to offer the faculty, staff, and students of Dillard University. Please review the services listed on the website or call the Helpdesk at (504) 816-4357.
