As you know, Dillard University has put in place many policies and procedures to protect our community from an outbreak of COVID-19. In spite of these efforts, it is possible that some members of our student, staff or student population may become infected with COVID-19. It is vital that anyone with a positive test result immediately contact the Office of Human Resources (Faculty/Staff) or Student Health Services (Students). We will quickly put in place our infection control protocols and ensure that you receive access to any and all services you need. But, in order to maximize the safety of the Dillard community, everyone who participates in any on-campus, in-person activity must follow the steps outlined below if they have received a positive (+) COVID-19 test result or have been in close contact (6 ft. or closer for 15 min. or longer) with someone who has tested positive.

1. **Positive COVID-19 Test Result or Close Contact with Individual with Positive COVID-19 Test Result**
   - Do not return to campus and contact the Office of Human Resources for additional information and to aid University in contact tracing.
   - Faculty and Staff will be required to quarantine for 14 days.
   - If possible, faculty and staff may telework.

   - Students
     - Immediately contact Student Health Services.
     - Students living in University housing will be asked to return home if safe to do so. The University will make quarantine housing available to those who cannot safely return home.
     - Commuter students will be asked to quarantine for at least 14 days.
     - Students will have daily check-ins.

   Following 14-day quarantine. Staff, faculty and students must produce evidence of negative COVID-19 test result to resume in-person, on-campus activities.

   - Staff or Faculty
     - May return to campus and/or campus activities 24 hours after complete resolution of symptoms. Must provide HR with negative test results.
   - Students
     - May return to campus and/or campus activities 24 hours after complete resolution of symptoms. Must provide Student Health Services with negative test results.
